Hello Lionel,

We have a question concerning the <http://www.php.net/manual/fr/function.strftime.php> Function and its Licensing.

We would like to use it in a GPL Project (TYPO3) and would like to ask you if can grant us the right to add it to a contrib folder.

Or better you could dual licence the code under the GPL.

Let me know if there is anything we can do for you to make this happen!

Best Regards,

Olivier
